Office Action Summary

Art Unit: 1763

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 30-52, 60-81, 86-105, 107-108, and 115-123 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-38 of U.S. Patent No. 6,287,978. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following.

This patent claims essentially the same subject matter as that which is claimed in the currently pending application.

3. Claims 30-52, 60-81, 86-105, 107-108, and 115-123 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,015,760. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following.

This patent claims essentially the same subject matter as that which is claimed in the currently pending application.

Art Unit: 1763

4. Claims 30-123 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-32 of U.S. Patent No. 5,880,036. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following.

This patent claims essentially the same subject matter as that which is claimed in the currently pending application.

5. Claims 30-52, 60-81, 86-105, 107-108, and 115-123 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 5,286,344. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following.

This patent claims essentially the same subject matter as that which is claimed in the currently pending application.

6. Applicant's arguments filed 6-10-03' have been fully considered but they are not persuasive.

Applicant argues the following points regarding the examiner's rejection of their claimed subject matter.

-Applicant has overcome all of the previous ODP rejections of their claimed subject matter through the submission of a terminal disclaimer.

The examiner must disagree.

-Applicant's terminal disclaimer is improper since it is not signed. The examiner must therefore maintain all of the previous ODP rejections of applicant's claims.

7. This action will not be made final.

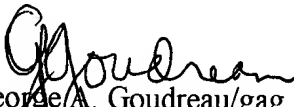

Art Unit: 1763

8. The examiner has initialed all IDS statements of record in which applicant has supplied the appropriate prior art references for review by the examiner. In those instances in which the appropriate prior art was not supplied by the applicant, a line was drawn through the references listed on the IDS to signify the fact that the references were unavailable for the examiner to review.
